

Company Name

Lone Star Cement - Fairview Ave.
North plant

Date: 10/1/81

Person Contacted: Dispatcher

Purpose of Visit: Check condition of settling ponds

Resume of Meeting: I stopped to speak with Mike Patricelli about
their experience with the settling ponds during the recent heavy
rainfall. Mr. Patricelli was not on the premises but his dis-
patcher related that he was not aware of any problems. He will
have Mr. Patricelli contact me. There are several questions whose
answers will be of interest:

(1) Did the stormwater retention system adequately contain the
yard drainage without necessity of pumping to Lake Union?

(2) Did Lone Star Cement ~~discharge~~ to the local sanitary sewer
during this episode?

(3) Does Lone Star Cement have any contingency plans regarding further
solids removal should solids prove to be accumulating in the local
sewer line?

I could see no evidence of any recent difficulties in the immediate
area of the plant during my visit.
